

# TENNESSEE INFLUENZA WEEKLY REPORT

WEEK  
42

October 13, 2024 - October 19, 2024

## INFLUENZA ACTIVITY SNAPSHOT

SURVEILLANCE INDICATOR	TREND	CURRENT WEEK	PREVIOUS WEEK
 <b>ILLNESS</b> Percentage of outpatient visits due to influenza-like illness (ILI)		<b>1.9%</b>	<b>1.9%</b>
 <b>LABORATORY</b> Percentage of positive specimens & predominant strain of influenza		<b>0.7%</b> <i>Flu A (H1N1)</i>	<b>0.0%</b> <i>no positive detections</i>
 <b>OUTBREAKS</b> 2 or more ill persons of a shared setting		<b>0</b>	<b>0</b>
 <b>DEATHS</b> Newly reported and season total pediatric influenza-associated deaths in TN		<b>0</b>	<b>0</b>

## INFLUENZA-LIKE ILLNESS (ILI)

### Percent of Outpatient Visits for Influenza-Like Illness Week 42

The U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) monitors outpatient visits for respiratory illness referred to as influenza-like illness (ILI). Tennessee has approximately 100 sentinel providers across the state that contribute this data weekly from a variety of healthcare setting such as primary care, pediatrics, county health departments, student health centers, and emergency departments.

ILI is defined as a fever plus cough or sore throat, not laboratory-confirmed influenza. Therefore these data may capture respiratory illness visits due to infection with any pathogen that can present with similar symptoms, including influenza, SARS-CoV-2, and RSV.

TN State Average	1.9%
Chattanooga/Hamilton County Metro	1.8%
East Region	1.6%
Jackson/Madison County Metro	0.0%
Knox County Metro	0.9%
Memphis/Shelby County Metro	1.6%
Mid Cumberland Region	2.0%
Nashville/Davidson County Metro	2.1%
Northeast Region	3.1%
Southeast Region	2.8%
South Central Region	1.0%
Sullivan County Metro	2.8%
Upper Cumberland Region	0.0%
West Region	0.7%

# TENNESSEE INFLUENZA

## WEEKLY REPORT

October 13, 2024 - October 19, 2024

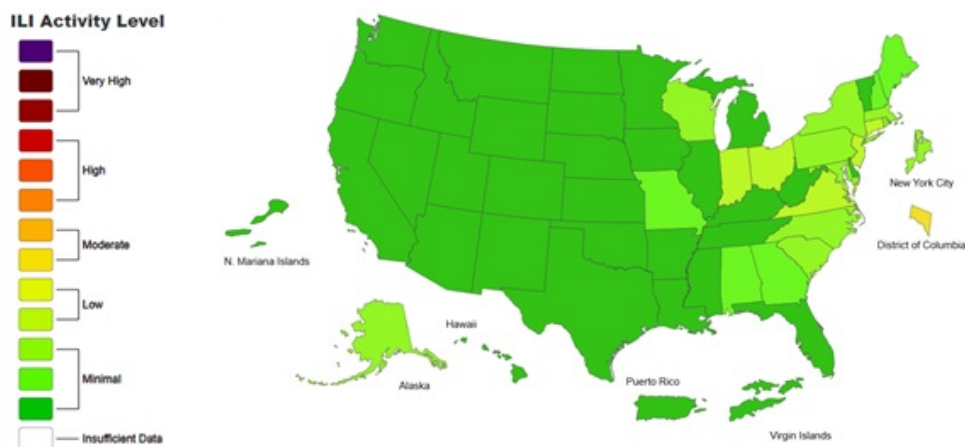

### INFLUENZA-LIKE ILLNESS (ILI)

ILI is defined as a fever plus cough or sore throat, not laboratory-confirmed influenza. Therefore these data may capture respiratory illness visits due to infection with any pathogen that can present with similar symptoms, including influenza, SARS-CoV-2, and RSV.

\*CDC develops state-specific baselines by calculating the mean percentage of patient visits for ILI during non-influenza weeks for the most recent two seasons and adding two standard deviations (2021-2022 and 2022-2023). A non-influenza time period (e.g., a "non-influenza week") is defined as two or more consecutive weeks in which each week accounted for less than 2% of the season's total number of specimens that tested positive for influenza in public health laboratories.

### National ILI Activity Week 42

Map prepared by CDC's Influenza Division and visualizes outpatient respiratory illness activity determined by data reported to ILINet. To access original source, visit: <https://gis.cdc.gov/grasp/fluview/main.html>

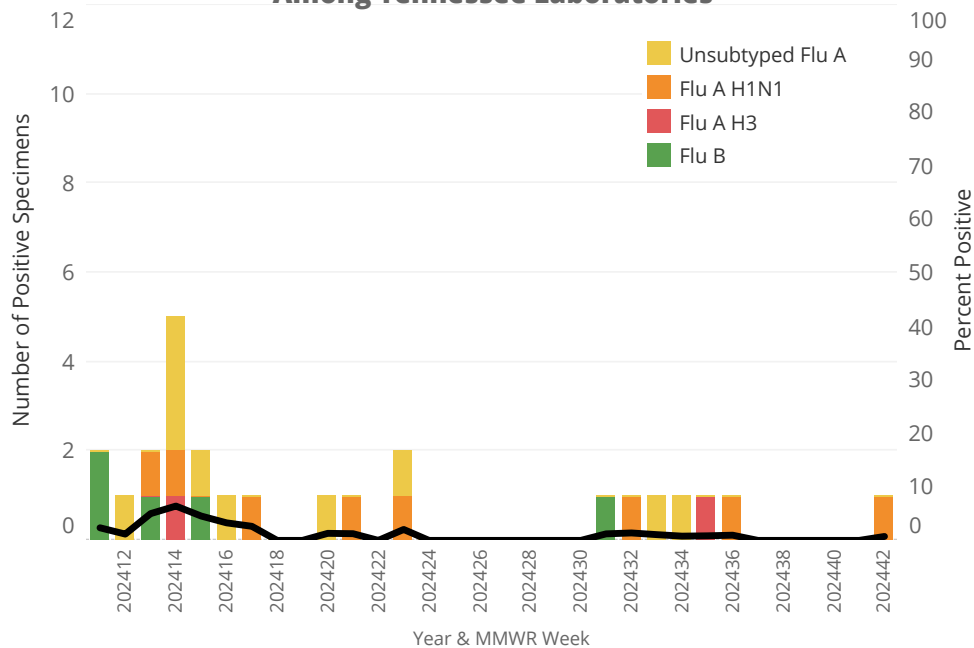

# TENNESSEE INFLUENZA

## WEEKLY REPORT

October 13, 2024 - October 19, 2024

### LABORATORY

#### Positive Tests by Influenza Type/Subtype and Percent Positivity Among Tennessee Laboratories

#### Week 42

Total # Specimens Tested 136

#### Positive specimens by type/subtype

Flu A H1N1	1
Flu A H3	0
Flu B	0
Unsubtyped Flu A	0

Percent Positive 0.7%

Influenza testing in Tennessee is represented as a combination of data from two commercial laboratories that serve clinics across the state. Data from the state public health laboratory are temporarily excluded due to ongoing code error resolution. Reporting will resume as soon as possible.

### OUTBREAKS & DEATHS

#### Flu Outbreaks Currently Open by Region

During the week of October 13, 2024 there were 0 open influenza outbreaks reported.

#### Influenza-Associated Pediatric Mortality Season Total, Statewide

There have been 0 pediatric influenza-associated deaths reported in Tennessee this season (began October 1, 2024).
